Seasons of Life

Seasons of Life is an outreach program that provides personalized claims resolution assistance to members and their families who are dealing with the death of a loved one. Seasons of Life ensures that members and their families have compassionate help when they need it.

Teladoc

Your district offers virtual care, through Teladoc, to you and your dependents enrolled in medical coverage through the district. With Teladoc, members can connect with a doctor in minutes, not hours or days like the ER, urgent care or doctor's office. Plus, you can get care from anywhere in the US: home, office, or on the road!

Teladoc does not replace your primary care physician. It is a convenient and affordable option for quality care:

- When you need care now
- If you're considering the ER or urgent care center for a non-emergency issue
- On a vacation, on a business trip, or away from home
- For short-term prescription refills when medically necessary

Set up your account by going to Teladoc.com, calling **1.800.Teladoc** or downloading the Teladoc mobile app. Once you register your account and complete your medical history, you will have access to speak with a doctor by phone or video on your mobile device, computer, or phone.

Hearing Aid Benefit Coverage

Benefits will be provided for Hearing Aids for covered persons when a Hearing Care Professional prescribes a Hearing Aid to augment communications. Some related services are included, such as audiological examinations and selection, fitting and adjustment of ear molds to maintain optimal fit when Medically Necessary; Hearing Aid repairs will be covered when deemed Medically Necessary.

Prescription Utilization Management Programs

Step Therapy

Step therapy is a program for people who take prescription drugs **regularly to treat a medical condition**, such as arthritis, asthma or high blood pressure. It allows **you and your family to receive the affordable treatment you need** and helps your organization continue with prescription-drug coverage.

In step therapy, drugs are grouped in categories, based on treatment and cost:

Front-line drugs — the first step — are generic and sometimes lower-cost brand drugs proven to be safe, effective and affordable. In most cases, you should try these drugs first because they usually provide the same health benefit as a more expensive drug, at a lower cost.

Back-up drugs — Step 2 and step 3 drugs — are brand-name drugs that generally are necessary for only a small number of patients. Back-up drugs are the most expensive option.

What if I can't use the less expensive (front-line) drug?

With step therapy, more expensive brand-name drugs are usually covered as a back-up in the program if:

1. You've already tried the generic drugs covered in your step therapy program
2. You can't take a generic drug (for example, because of an allergy)
3. Your doctor decides, for medical reasons, that you need a brand-name drug

If one of these situations applies to you, your doctor can request an override or a "prior authorization" for you, allowing you to take a back-up prescription drug. Once the override is approved, you'll pay the appropriate copayment for this drug. If the override isn't approved, you will either have to pay full price for the back-up drug or take an alternative.

Prior Authorization

When your pharmacist tried to fill your prescription, the computer system indicated "prior authorization required." This means **more information is needed to determine if your plan covers the drug**.

Ask your doctor to call Express Scripts (PPO) — the company chosen to manage your pharmacy benefit — or to prescribe another medication that's covered by your plan. Only your doctor can give the information needed to see if your drug can be covered. If the information provided meets your plan's requirements, you pay the plan's copayment at the pharmacy.

You also have the option to pay full price for the prescription at your pharmacy.

Drug Quantity Management

Drug quantity management, also known as DQM, is a program in your pharmacy benefit that's designed **to make the use of prescription drugs safer and more affordable**. It provides the medication you need for your good health and the health of your family, while making sure you receive them in the amount — or quantity — considered safe.
