

Students

Administering Medicines to Students

Students should not take medication during school hours or during school-related activities unless it is necessary for a student's health and well-being. When a student's licensed health care provider and parent/guardian believe that it is necessary for the student to take a medication during school hours or school-related activities, the parent/guardian must request that the school dispense the medication to the child and otherwise follow the District's procedures on dispensing medication.

No School District employee shall administer to any student, or supervise a student's self-administration of, any prescription or non-prescription medication until a completed and signed School Medication Authorization Form is submitted by the student's parent/guardian. No student shall possess or consume any prescription or non-prescription medication on school grounds or at a school-related function other than as provided for in this policy and its implementing procedures.

Nothing in this policy shall prohibit any school employee from providing emergency assistance to students, including administering medication.

The Building Principal shall include this policy in the Student Handbook and shall provide a copy to the parent(s)/guardian(s) of students.

Self-Administration of Medication

A student may possess an epinephrine injector, e.g., EpiPen®, and/or asthma medication prescribed for use at the student's discretion, provided the student's parent/guardian has completed and signed a *School Medication Authorization Form*. The School District shall incur no liability, except for willful and wanton conduct, as a result of any injury arising from a student's self-administration of medication or epinephrine injector or the storage of any medication by school personnel. A student's parent/guardian must indemnify and hold harmless the School District and its employees and agents, against any claims, except a claim based on willful and wanton conduct, arising out of a student's self-administration of an epinephrine injector and/or medication, or the storage of any medication by school personnel.

Designated Caregiver Administration of Medical Cannabis

The Compassionate Use of Medical Cannabis Pilot Program Act allows a parent/guardian of a student who is a minor to register with the Ill. Dept. of Public Health (IDPH) as a *designated caregiver* to administer medical cannabis to their child. A designated caregiver may also be another individual other than the student's parent/guardian. Any designated caregiver must be at least 21 years old and is allowed to administer a medical *cannabis infused product* to a child who is a student on the premises of his or her school or on his or her school bus if:

1. Both the student and the designated caregiver possess valid registry identification cards issued by IDPH;
2. Copies of the registry identification cards are provided to the District, and
3. That student's parent/guardian completed, signed, and submitted a *School Medication Authorization Form - Medical Cannabis*.

Medical cannabis infused product (product) includes oils, ointments, foods, and other products that contain usable cannabis but are not smoked or vaped. Smoking and/or vaping medical cannabis is prohibited.

After administering the product to the student, the designated caregiver shall immediately remove it from school premises or the school bus. The product may not be administered in a manner that in the opinion of the District or school, would create a disruption to the educational environment or cause exposure of the product to other students. A school employee shall not be required to administer the product.

Discipline of a student for being administered a product by a designated caregiver pursuant to this policy is prohibited. The District may not deny a student attendance at a school solely because he or she requires administration of the product during school hours.

The ***Designated Caregiver*** Administration of Medical Cannabis section of the policy is void and the District reserves the right not to implement it if the District or school is in danger of losing federal funding.
