

COVID-19 Protocol

Self-Certification Symptom Screening

To prevent the spread of COVID-19, all District staff members and students (through their parents/guardians) must self-certify prior to coming to the District and verify that they do not have a fever (meaning a temperature under 100.4) and that they do not have any of the symptoms of COVID. The symptom screening checklist is provided below.

District Employees

District employees shall provide a daily verification of self-certification as follows:

All employees will self certify using the Crisis Go App on a daily basis.

If an employee has not properly self-certified, they will need to undergo a temperature check and verify they are symptom-free before being permitted entry to any school building.

Students

Parents/Guardians and students over the age of 18 shall provide a daily verification of self-certification as follows:

All parents will self certify their students using the Crisis Go App on a daily basis.

If a parent/guardian has not completed the self-certification prior to the student arriving at the District, the student will be provided a symptom screening pursuant to the District's symptom screening protocol.

Students on Buses

For students traveling to school on the bus, parents/guardians and students over the age of 18 shall provide a daily verification of self-certification as follows:

All parents will self certify their students using the Crisis Go App on a daily basis.

Visitors

Visitors will be screened upon arrival at the District pursuant to the District's symptom screening protocol.

Self-Screening Checklist

Please identify whether you have any of the following symptoms. Please focus on new or unexpected symptoms (e.g. a chronic cough would not be a positive screen).

- o Fever or feeling feverish (chills, sweating)
- o New cough
- o Shortness of breath or difficulty breathing
- o Sore throat
- o Muscle aches or body aches
- o Vomiting or diarrhea
- o New loss of taste or smell
- o Chills

- o Fatigue
- o New or unusual headaches
- o Congestion or runny nose

Confirm that they have not had close contact (within 6 feet for at least 15 minutes) with a person known to be infected with COVID-19 within the last 14 days.
